ORGANISED BY

God calls Christians to be salt and light.

How can we best answer that call in our health care workplaces, where we meet hurting people every day? How to equip healthcare workers to grow in holistic care?

The Saline Process

*The purpose of the Saline Process training is to equip health care workers to be witnesses for Christ in their clinical settings. The Biblically based teaching is relevant to different cultures and health care settings and has been taught on every continent. Participants learn eight tools that can be put into practice with their patients and colleagues. After completing the Saline Process, participants should be able to assess a patient's attitude toward Christ and know how to respond appropriately, applying **the ethical principles of permission, sensitivity, and respect.***

Join us in the vision to see more health workers equipped to be effective witnesses for Christ in their workplace!
